Skills

JAVA | Python | CSS | JavaScript | HTML

Adobe Photoshop | Adobe Premier Pro | MERN

Projects

CTFByte

Developed a beginner-friendly CTF Platform with integrated chat forum using Django. This project aims to provide an interactive environment for users to learn and practice cybersecurity skills through Capture The Flag challenges, while also fostering community engagement and support through the integrated chat forum

EZShopping

Crafted a robust MERN stack ECommerce website tailored for food delivery services.The platform empowers customers to browse, order, and pay for their favorite meals, while providing restaurants a user-friendly interface to manage their offerings and orders effectively.

Expense Tracker

Designed a user-friendly expense tracking website tailored for students. Leveraged the MERN stack to provide an intuitive platform that allows effortless monitoring and management of expenses, promoting effective financial tracking for students.
